

Applicable to over 5000 antibodies at 25 ul size*
Valid till 30th September 2011

GeneTex

An Amazing Offer

Genetex Primary Antibodies at SGD 110!

Genetex offers the highest quality of immunological tools for scientists studying cancer, regulation of cell cycle and DNA repair and replication.

Their wide range of antibodies covers the following research areas:

Angiogenesis
Apoptosis
Blood related
Cancer related
CD marker
Cell communication
Cell cycle
Disease related

DNA replication and repair
Gene Expression
Growth factor
GPCR
Housekeeping
Ion transport
Immune system
Kinase and Phosphatase

Membrane transport
Metabolism
Neuroscience
Protein folding and degradation
Signal transduction
Stem cell

For full listing of eligible Primary Antibodies, please download list at:
